CD-2022-08 (Locomotive, NRCI)

June 6, 2022

SUBJECT: Deployment of Production Volume Reporting Module for the Nonroad Compression-Ignition Engines (NRCI) and Locomotive Industries.

Dear Manufacturer:

The purpose of this letter is to announce the deployment date for the production volume reporting module for the nonroad compression-ignition engines (NRCI) and locomotive industries.

These updates are scheduled to be deployed on Friday, July 22, 2022 (with a planned back-up date of July 29, 2022). This means that beginning Monday, July 25, 2022 (or August 1, 2022, if the back-up date is needed), NRCI and locomotive manufacturers must use the new Production Volume Reporting module to submit new model year 2022 and later production volume reports and any updates to pre-model year 2022 reports.

Supporting documentation for the module can be found on our website at <https://www.epa.gov/ve-certification/system-documentation-and-guidance-production-volume-reporting>.

If you have any questions, please contact Holly Pugliese of my staff at pugliese.holly@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Byron Bunker".
